Install Update

Name	Description	Version
abind	Combine Multidimensional Arrays	1.4-5
afex	Analysis of Factorial Experiments	1.0-1
apa	Format Outputs of Statistical Tests According to APA Guidelines	0.3.3
arm	Data Analysis Using Regression and Multilevel/Hierarchical Models	1.12-2
askpass	Safe Password Entry for R, Git, and SSH	1.1
backports	Reimplementations of Functions Introduced Since R-3.0.0	1.2.1
base64enc	Tools for base64 encoding	0.1-3
BH	Boost C++ Header Files	1.75.0-0
brio	Basic R Input Output	1.1.3
broom	Convert Statistical Objects into Tidy Tibbles	0.7.10
callr	Call R from R	3.7.0
car	Companion to Applied Regression	3.0-12
carData	Companion to Applied Regression Data Sets	3.0-4
caret	Classification and Regression Training	6.0-90

# Entorno Rstudio:

## Activar paquete readxl

Dar click en Packages y en la lupa buscar read y hacer click en el cuadrito de readxl para activarlo y en la consola el comando library(readxl)

The screenshot shows the RStudio interface. The top menu bar includes File, Edit, Code, View, Plots, Session, Build, Debug, Profile, Tools, and Help. The left sidebar has tabs for Data, fit, and Global Environment. The Data tab shows a table with one row: Name (fit), Type (NULL), and Value (Pairlist of length 0). The Global Environment tab shows the message "Environment is empty". The bottom-left pane is the Console, displaying the standard R welcome message and help information. The bottom-right pane is the Packages tab, which lists various packages with their descriptions and versions. The package 'readxl' is checked, indicating it is installed and active.

Name	Description	Version
readr	Read Rectangular Text Data	1.4.0
readstata13	Import 'Stata' Data Files	0.10.0
<b>readxl</b>	Read Excel Files	1.3.1
cellranger	Translate Spreadsheet Cell Ranges to Rows and Columns	1.1.0
clipr	Read and Write from the System Clipboard	0.7.1
foreign	Read Data Stored by 'Minitab', 'S', 'SAS', 'SPSS', 'Stata', 'Systat', 'Weka', 'dBase', ...	0.8-81
jpeg	Read and write JPEG images	0.1-8.1
png	Read and write PNG images	0.1-7
prettyunits	Pretty, Human Readable Formatting of Quantities	1.1.1
foreign	Read Data Stored by 'Minitab', 'S', 'SAS', 'SPSS', 'Stata', 'Systat', 'Weka', 'dBase', ...	0.8-81

```
R is free software and comes with ABSOLUTELY NO WARRANTY.  
You are welcome to redistribute it under certain conditions.  
Type 'license()' or 'licence()' for distribution details.  
  
R is a collaborative project with many contributors.  
Type 'contributors()' for more information and  
'citation()' on how to cite R or R packages in publications.  
  
Type 'demo()' for some demos, 'help()' for on-line help, or  
'help.start()' for an HTML browser interface to help.  
Type 'q()' to quit R.  
  
> library(readxl)  
>
```

# Entorno Rstudio: Instalación de paquete lavaan solo se instala una vez

Dar click en Packages y seleccionar install

The screenshot shows the RStudio interface with the following components:

- Top Bar:** RStudio, File, Edit, Code, View, Plots, Session, Build, Debug, Profile, Tools, Help.
- Toolbar:** Data, fit, Show Attributes, Go to file/function, Addins.
- Environment Pane:** Shows "Environment is empty".
- Global Environment:** Shows a table with one entry: Name: fit, Type: NULL, Value: Pairlist of length 0.
- Console:** Displays R startup messages and a help message about redistribute rights.
- Terminal:** Displays the command "R 4.1.2 · ~ /".
- Packages Dialog:** An "Install Packages" dialog is open, showing:
  - Install from: Repository (CRAN)
  - Packages (separate multiple with space or comma): lavaan
  - Install to Library: C:/Users/aleiva/Documents/R/win-library/4.1 [Default]
  - Install dependencies
  - Buttons: Install, Cancel
- Viewer:** A table of packages in the User Library, including:

Name	Description	Version
abind	Combine Multidimensional Arrays	1.4-5
afex	Analysis of Factorial Experiments	1.0-1
apa	Format Outputs of Statistical Tests According to APA Guidelines	0.3.3
arm	Data Analysis Using Regression and Multilevel/Hierarchical Models	1.12-2
askpass	Safe Password Entry for R, Git, and SSH	1.1
backports	Reimplementations of Functions Introduced Since R-3.0.0	1.2.1
base64enc	Tools for base64 encoding	0.1-3
BH	Boost C++ Header Files	1.75.0-0
brio	Basic R Input Output	1.1.3
broom	Convert Statistical Objects into Tidy Tibbles	0.7.10
callr	Call R from R	3.7.0
car	Companion to Applied Regression	3.0-12
carData	Companion to Applied Regression Data Sets	3.0-4
caret	Classification and Regression Training	6.0-90

# Entorno Rstudio:

## Activar paquete lavaan

Dar click en Packages y en la lupa buscar lavaan y hacer click en el cuadrito de lavaan para activarlo y en la consola aparece el comando library(lavaan)

The screenshot shows the RStudio interface with several panes:

- Environment pane:** Shows the variable `fit` of type `NULL`.
- Packages pane:** Shows the `lavaan` package selected for installation.
- Console pane:** Displays the R startup message, the `library(lavaan)` command, and its response: "This is lavaan 0.6-9 lavaan is FREE software! Please report any bugs."

# Entorno Rstudio:

## Instalación y Activación de paquetes con comandos

```
# Teclear el comando en la consola teclear solo se hace una vez
```

```
> install.packages(readxl)  
> install.packages(lavaan)
```

```
# Teclear en la consola se hace cada vez que se va a usar el paquete
```

```
#Llamada a software LAtent VAriable ANalysis (LAVAAN)
```

```
>library ("lavaan")  
>library ("readxl")
```
